Fax Enquiry Form to + 49 - 7348 - 98 69 40

Enquiry concerning HDPE or PP storage tanks with construction certification from German Institute of Construction Technology (DIBt) Berlin in accordance with Section 19 I of the German Water Conservation act.

Installation Site

- Indoors with PE containment shell
- Indoors, no shell (i.e. provided by customer)
- Outdoors with PE containment shell
- Outdoors, no shell (i.e. provided by customer)
- Double-wall tank indoors
- Double-wall tank outdoors
- Ambient temperature: _____ °C
- Insulation / heating: _____
- Cage ladder / material: _____
- Access platform / material: _____
- Peripheral railings / material: _____

Dimensions

- Tank I.D. in mm: _____
- Tank height in mm: _____
- Containment shell I.D. in mm _____
- Containment shell height in mm _____

Tank Contents

- Volume in L: _____
- Substance: _____
- Density: _____
- Storage temperature: _____ °C

Ventilation Inlet / Outlet

- Free
- Through U-elbow in tank roof
- Through manhole
- Through pipe line to atmosphere
- Line length in mm: _____
- Through absorber bath
- Through fume hood or neutralizer
- Through chemical vapour lock

Pressure

- Atmospheric
- Pmax filling + 0.005 bar gauge
- Pmax removal - 0.003 bar gauge

Overfilling Safeguard

- Signal device

Leak Detector

- Signal device

Filling Level Monitor

- Sight pipe with float _____
- No. of limit contacts _____

Inlet/Outlet Ports

- Ventilation inlet / outlet _____
- Filling I.D.: _____
- Take-off with foot valve I.D.: _____
- Take-off without foot valve I.D.: _____
- LIC level indication + control _____
- Overfill safeguard line I.D. 50 mm _____
- Lifting lugs: _____
- Manhole I.D.: _____
- Reserve port I.D.: _____

Equipment of Filling Cabinet

- Hand control elements
- Automatic control elements
- Check valve
- Visual/acoustic alarm
- Catchment basin for drippage

Erection and Installation:
